

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph 55, as follows:

[0055] As shown in FIG. 9, ~~dummy~~ real bridges 83' can be formed on the dummy bridge region 88 so that the number of real bridges decreases in an X-axis direction from the center of the real bridge region 85 to the peripheral portion thereof. Thus, the pitch of a real bridge gradually increases in a direction from the center of the tension mask 80 to the periphery thereof.
